### What Our operators will need if You Breakdown

- Your name and Policy number
- The Vehicle's make, model and registration number
- The exact location of the Vehicle, such as the road You are on, an identifiable landmark or the unique 3 word combination for your location from what3words.
- What You suspect the nature of the fault is
- The telephone number You are calling from
- They will then arrange for a Recovery Operator to go to the given location as quickly as possible.

### Help Us In Order To Help You

Ascertaining your location in the event of a breakdown is a fundamental part of reporting a claim. To make this process as simple, easy and accurate as possible, 2Gether Insurance have teamed up with what3words.

Street addresses weren't designed for the current day and age. They aren't accurate enough to specify precise locations, such as building entrances, and don't exist for parks and many rural areas. This makes it hard to find places and prevents people from describing exactly where help is needed in an emergency.

what3words divided the world into 3 metre squares and gave each square a unique combination of three words. It's the easiest way to find and share exact locations. Millions of people around the world use what3words to make life safer, more efficient and less frustrating.

what3words does not aim to replace street addressing. Rather, it is a useful addition when street addresses are not accurate enough, and an instant, scalable solution where addresses do not exist. Compared to current street addressing systems, 3 word addresses are far more accurate, as they refer to a specific 3m x 3m area. As the entire what3words grid is fixed, the 3 word address for a particular location will never change even if buildings or streets are redeveloped.

3 word addresses are unique, unlike street names which are often duplicated, and they are easier to communicate and share with others.
